

ES/TCP™

IBM® 5250 over TCP/IP
Emulation Software

ES/TCP from N Lynx is a simple and straightforward software solution that provides TN5250e display and printer emulation over TCP/IP to your AS/400 and is compatible with both 16- and 32-bit environments. ES/TCP software supports Windows 3.x, Windows 95, 98, NT, 2000, ME and XP environments.

Works over TCP/IP. No need to have multiple protocols running over your network.

Single solution for all Windows operating systems. ES/TCP provides terminal and printer emulation for Windows 3.x, Windows 95, 98, NT, ME, 2000 and XP—all in a single solution.

Multilanguage support. Localized product for English, French, Italian, German, and Spanish.

Printer options. Choose from a variety of popular printers supported by the PC. Up to three printers are supported at any one time, each running independently while another host or PC application is active.

Hotspots identify host menu items.

Host menu items and function keys can be assigned colors. Employ this aesthetic and intuitive approach to locate them quickly and easily.

Keystroke memory and playback (macros). Predefine keystrokes for automated sign-on, repetitive data entry, or unattended operation. Store as many as 2,048 keystrokes in up to 24 keyboard macros.

ETU® file transfer support. ETU, an industry standard from N Lynx Systems, allows direct file transfer between the PC and System/36, Advanced Series/36, or AS/400.

ADDITIONAL FEATURES:

- Drop-down menu support using mouse button.
- Keyboard mapping allows easy reconfiguration to support existing keyboards.
- Advanced printer support includes autorotate and autosize functions.
- With Application Program Interface (WINHLLAPI), unlimited options are available for simplifying PC operations, including use of internally developed or third-party software.
- Custom tool bar allows users to create their own easy-to-use buttons for frequently used items, including macros.
- Print emulation over TCP/IP.

EMERALD SERIES

ES/TCP™

General

The ES/TCP Package:

- Quick Installation Guide
- ES/TCP CD

Part Number:

ES/TCP single-user - 301-9603-01

Warranty: N Lynx limited one-year warranty for hardware and 90 days for firmware/software. The N Lynx ASSIST™ Program is available to provide extended technical support services. Ask for current rates and terms.

Technical Support: In the U.S., technical support is available between 7:30 a.m. and 7:00 p.m. (CST), Monday through Friday, toll-free on 1-888-659-6967. For Asia/Pacific, Australia, and Latin America, call (512) 301-8180. For Europe, Africa, and the Middle East, call +44 161 928 7014.

PC System Requirements

IBM PC (or compatible) with 386, 486, or Pentium® processor

- CD ROM Drive
- Hard disk with 6MB space available
- Minimum of 8MB of memory
- Windows 3.X, Windows 95, 98, NT, 2000 or XP.
- TCP/IP installed on the PC

For additional information, visit the N Lynx Web site at www.nlynx.co.uk

Distribution Channels

ES/TCP is available through N Lynx Systems Approved Business Partners, Distributors and Value Added Reseller networks. For information on the contact in your area or for international distribution channels, please call 1-800-329-2696 or 512-301-8000.

Related N Lynx Products

ETU: File transfer utility that resides on the S/3X or AS/400 and provides menu-driven options for transfer and translation of data between the PC and host.

ES/PCI™: Plug and Play PCI, 7 session Twinax Adater card and emulation software.

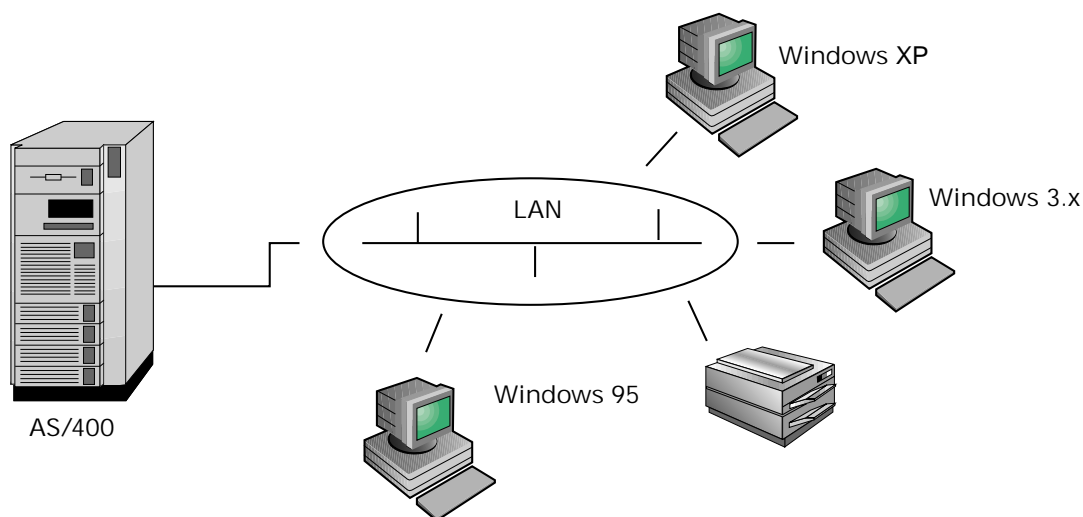

ES/3XTwin®: Powerful seven session hardware/software bundle for PC-to-IBM® midrange twinax emulation, supporting all Windows operating systems in a single solution. Includes 16- and 32-bit display and printer

emulation for any Windows environment. No IRQ required! Also Available for DOS.

ES/Remote™: Software and hardware combination that allows users dial-up remote access to an IBM Midrange System. Works in conjunction with N Lynx's Access/400™ Remote Access Unit. Also available for Macintosh and DOS users.

ES/Server™: Low-cost gateway, connecting via Twinax to an IBM Midrange to share seven emulation sessions (per adapter) over an Ethernet or Token Ring LAN.
